Buddy vs Jenkins opinions
Almost everyone thinks Buddy is a great alternative to Jenkins.

Gu   Easy to use interface, simple setup
Positive comment • almost 2 years ago   👍 0 👎

Bamboo Continuous Integration

Is this a good alternative?   👍 Yes   👎 No

Paid • Proprietary   Mac   Windows   Linux

Continuous Integration   Continuous Deployment   Multi-branch build

♥ 10   36 alternatives to Bamboo Continuous Integration ⬈

Todays development teams are adopting continuous integration to increase productivity and improve code quality. By automatically compiling and testing code as it changes, Bamboo provides instant feedback for developers and allows quick collaboration.

Most users think Bamboo Continuous Integration is a great alternative to Jenkins.

JetBrains TeamCity
Is this a good alternative? 👍 Yes 👎 No

Free Personal • Proprietary   Mac   Windows   Linux   Online

Distributed   Code Quality   Software developer

♥ 30   31 alternatives to JetBrains TeamCity ☑

TeamCity is a continuous integration and build management system. With TeamCity, you can set up a build server within minutes and enjoy out of the box continuous unit testing, code quality analysis, and early reporting on build problems — even without leaving your favorite IDE.

Some users think JetBrains TeamCity is a great alternative to Jenkins, some don't.

Buildbot
Is this a good alternative? 👍 Yes 👎 No

Free • Open Source   Mac   Windows   Linux   BSD   Self-Hosted

Python-based   Continuous Integration

♥ 31   43 alternatives to Buildbot ☑

Buildbot - The Continuous Integration Framework Buildbot is an open-source framework for automating software build, test, and release processes.

Buildbot vs Jenkins opinions

Some users think Buildbot is a great alternative to Jenkins, some don't.

Gu   Buildbot has a convoluted interface where configuration is a messy python dictionary, and is not clearly suited to multiple projects. It is not anywhere near as readymade as Jenkins
Negative comment • almost 2 years ago   -1

Drone.io   Is this a good alternative? 👍 Yes 👎 No

Freemium • Open Source   Online   Self-Hosted   Docker
Extensible by Plugins/Extensions   Continuous Integration

♥ 13   29 alternatives to Drone.io ↗

Drone is a Continuous Delivery system built on container technology. Drone uses a simple YAML configuration file, a superset of docker-compose, to define and execute Pipelines inside Docker containers.

Most users think Drone.io is a great alternative to Jenkins.

AppVeyor   Is this a good alternative? 👍 Yes 👎 No

Freemium • Proprietary   Online
Continuous Integration

♥ 12   14 alternatives to AppVeyor ↗
